Subject Index

Acoustic and electrical stimuli 97
- impedance of the ear 185, 187, 334
- neurinomas 257
- sources, separate 110
- trauma 323

Acquired deafness 212
Action potentials 340
Adaptation, auditory 340
–, central 172
Air-conduction audiometry 115, 146
Amplitude modulation 146
–, N_1-P_2 18, 353
Anoxia, neonatal 284
Antiphasic stimuli, dichotic and 77, 353
Artificial mastoid 23
Ascending and descending thresholds 203
Attention 177
Audiogenetic susceptibility 298
Audiometry, air-conduction 115, 146
–, automatic 358
–, Békésy 358
–, bone-conduction 23, 115, 129, 146
–, Electric Response (ERA) 9, 18, 177, 353, 358, 365
–, identification 193, 334
–, speech 115, 164
Auditory adaptation 340
- discrimination tasks 177
- evoked potentials 18, 177, 353, 358, 365
- genetics 212, 222, 234, 257, 284, 291, 298, 315
- localization 110
- masking 30, 41, 48, 65, 77, 85, 97, 110 115, 129, 138, 145, 146, 340, 353
- nerve, neural activity in the 77

Auropalpebral reflex 193
Automatic audiometry 358
- masking procedure 115, 146

Autosomal dominant deafness 212
- recessive deafness 212

Backward masking 65
Behavioral thresholds 97
Békésy audiometry 358
Binaural detection and lateralization 77
- listening, monaural and 18, 110, 146
- loudness summation 48

Bone-conduction 9
- audiometry 23, 115, 129, 146
- vibrators, calibration of 23

Brain mechanisms 97
- potentials 177

Calibration of bone-conduction vibrators 23
Central adaptation 172
- masking 48
- masking, temporal decay of 48
- mechanisms 77

Childhood deafness 234, 334
– –, profound 212
Children, detection of hearing impairment in 193, 203, 334
Classification of tinnitus 138
Cochlea, hereditary susceptibility of the 315
Cochlear degeneration 138
- electrophysiology 340
- mechanics 30
- microphonic 234, 298
- nucleus, neural activity in the 48

Complete and partial masking 30
Congenital deafness 284
- fixation of the stapes footplate 222
- hearing loss 284

Conventional speech audiometry 164
Cortical evoked potentials 9

XUM

Counseling, genetic 222
Critical band 30
– -band noise 48
Cross-masking 115
Cross-modality depression of response 9
– interactions 9

Deaf mutism 234
Deafness, acquired 212
–, autosomal dominant 212
–, autosomal recessive 212
–, childhood 234, 334
–, congenital 284
–, genetically determined 212
–, industrial 138
–, neural 257
–, prenatal diagnosis of 222
–, renal tubular acidosis with 222
– syndromes, hereditary 257
Descending thresholds, ascending and 203
Detection of hearing impairment in children 193, 203, 334
Dichotic and antiphasic stimuli 77, 353
– listening, monotic and 65
Difference limen for frequency 146
– – for intensity 146
Differences in temporal order 85
Discomfort level 172
Driven neural activity 48

Electric Response Audiometry (ERA) 9, 18, 177, 353, 358, 365
Electrical stimuli, acoustic and 97
Electrode construction 365
– frequency response 365
– impedance 365
Electrophysiological aspects of masking 97
Epidemiology of hearing loss 234
Etiologic factors 234
Extrinsic masker 48

False-alarm rate 41
Familial sensori-neural hearing loss 315
Frequency, difference limen for 146
– modulation 18, 146
Frequency-selectivity 340
Forward masking 65, 340

Gene, recessive 298
Genetic counseling 222
– inheritance 284
– mechanisms 234
– mutation 284
– predisposition 212
Genetically determined deafness 212
Genetics, auditory 212, 222, 234, 257, 284, 291, 298, 315
Guinea pig 340

Habituation 172, 193
Haemolytic disease of the newborn 284
Head movement, effect of 110
Hearing aids 110, 146
– impairment in children, detection of 193, 203, 334
Hearing loss, congenital 284
– –, epidemiology of 234
– –, familial sensori-neural 315
– –, industrial 138
– –, low-frequency 222, 257
– –, noise-induced 172, 323
Hereditary deafness syndromes 257
– susceptibility of the cochlea 315
Histopathology 234, 298
Hit rate 41

Identification audiometry 193, 334
Individual differences 9
Industrial deafness 138
– hearing loss 138
Influence of masker duration 65
Inheritance, genetic 284
– in man, patterns of 222
Intensity cues, interaural 110
–, difference limen for 146
Interaural intensity cues 110
– temporal cues 110
– transmission loss 115
Inter-stimulus interval, effect of 9
Intrinsic noise of the organism 48

Latencies of N_1 and P_2 353
Latency, N_1 peak 18
Lateralization, binaural detection and 77
– test 115

Localization, auditory 110
Loudness 172
– level of the masked tone 30
– recruitment 340
– summation, binaural 48
Low-frequency hearing loss 222, 257
Lower mammals 234

Male war veterans 323
Masked tone, loudness level of 30
Masker duration, influence of 65
–, extrinsic 48
– level, effect of 30
Masking, auditory 30, 41, 48, 65, 77, 85, 97, 110, 115, 129, 138, 145, 146, 340, 353
–, backward 65
–, central 48
–, complete and partial 30
–, electrophysiological aspects of 97
–, forward 65, 340
–, partial 85
–, simultaneous 65, 340
– of speech 110
–, temporal decay of central 48
–, temporal extent of 65
– in vision 65
– of transient signals 85
Masking curves of tinnitus 138
Masking Level Difference (MLD) 77, 353
Masking level, maximum usable 115
– –, minimum effective 115
– noise, types of 115
– procedure, automatic 115, 146
Maternal rubella 284
Maximum usable masking level 115
Medial geniculate evoked response 97
Menière's disease 138
Middle-ear muscle reflexes 172, 334
Minimum effective masking level 115
Modifications of speech audiometry 164
Monaural and binaural listening 18, 110, 146
Monotic and dichotic listening 65
Moro reflex 193
Mouse, Swiss/RB 298
Mutation, genetic 284

N_1-P_2 amplitude 18, 353
N_1 peak latency 18, 353
Neonatal anoxia 284
– behavior 193
Nerve fiber 340
Neural activity in the auditory nerve 77
– – in the cochlear nucleus 48
– –, driven 48
– –, spontaneous 48
– deafness 257
– tuning curves 48
Noise, critical-band 48
– exposure, war-time 323
– -induced hearing loss 172, 323
– of the organism, intrinsic 48
– plus signal vectors 77
Normal bone-conduction threshold 23

Operant reinforcement principles 203
Organ of Corti 298
Otitis media, secretory 334
– –, serous 138
Otosclerosis 257
Ototoxicity 315

P_2 peak latency 353
Partial masking 85
– –, complete and 30
Patterns of inheritance in man 222
Prenatal diagnosis of deafness 222
Presbyacusis 138, 164
– equations 323
Profound childhood deafness 212
Psychometric functions 41

Rainville methodology 129, 146
Ramp duration, effect of 18
Receiver Operating Characteristic (ROC) 41
Recessive gene 298
Recruitment, loudness 340
Renal tubular acidosis with deafness 222
Reverberation time, effect of 164
Rubella, maternal 284

SAL test 129
Shock stimuli 9

XUM

Secretory otitis media 334
Segregation analysis 234
Sensorineural Acuity Level (SAL) 129
Separate acoustic sources 110
Serous otitis media 138
'Shadowing' technique 115
Short-time spectral analysis 85
Signal detection theory 41
– vectors, noise plus 77
Simultaneous masking 65, 340
Spectral analysis, short-time 85
Spectrum analyzer, speech 85
Speech audiometry 115
– –, conventional 164
– –, modification of 164
–, masking of 110
– spectrum analyzer 85
Spontaneous neural activity 48
Stapes footplate, congenital fixation of the 222
Statistical decision theory 41
Stimulus control criteria 203
Susceptibility, audiogenetic 298
Swiss/RB mouse 298
Temporal cues, interaural 110
– decay of central masking 48
– extent of masking 65
– integration 358
– order, differences in 85
Threshold, normal bone-conduction 23
– variability 203
Thresholds, ascending and descending 203
–, behavioral 97
Time-intensity trade 77
Tinnitus, classification of 138
–, inhibition of 138
–, masking curves of 138
Transient signals, masking of 85
Transmission loss, interaural 115
Tuning curves, neural 48
Two-interval task 41

Vibro-tactile stimuli 9

War-time noise exposure 323
War veterans, male 323

KUM
